Industrial free on means that every member of society shall be a producer, that every producer shall have access to, and a voice in the management of, the means of life, receiving the full product of his toil. It means that the ownership of the arth and the machinery of production by the predatory capitalist class shall be forever abol-ished. It means that many will no longer be compelled to beg the few to "give them leave to toil." It means the end of exploitation and social parasitism, of slavery and poverty, of prostitution, idle-ness, war, and the idea of government by forces. The I. W. As long as the Parasites use any and every means of riding the backs of Labor, Labor is justified in using any and every mea of bucking them off.

A "slacker" is not a slave who refuses to slit throats or get his hide perforated for the master class. A "slacker" is one who is too cowardly or stupid to join with his feldow workers against the ex-ploiters of Labor-one who neglects the interests of himself, his wite and family, and of his class in order to make efficient profit or cannon fodder out of his workless carcass. The "slacker" is too spineless to organize, too servite to use telling tarticis against the-boos, too demse to know that in defending members of his class from persecu-tion by the boses, he is defending himself, too ignorant to know that the bosses' gain is his loss. "Slacker" is agoifter name for "scissor-bill."

Is there any good reason why a rebel should try to dissuade a "acisorbill" from getting himself "bumped off" for the master class? The papers that accuse is of doing this are nuty. If any member of the dispossessed projectariat wants to travel the "Good Mowing, Jeans" route to the tune of "My Country, This of Thee," there is nothing left for us th do but wish them godspeed. Conscription, though, would be another matter.
